

TESTING EVERY VINE SINCE 2014

**ON GUARD AGAINST VIRUSES**

For nearly fifteen years, the name Euro Grapevine Nursery was synonymous in Canada with high-quality virus-free grapevines.

In 2001, Eckhard had the opportunity to serve Northern California. He's never forgotten his roots, and he still takes pride in serving the Canadian grapevine market with healthy plants.

Since 2014, in response to the outbreak of red blotch, he has tested every plant for viruses. It's this level of care for his product that makes his grapevines exceptional.

Whether it was through his original Euro Grapevine Nursery in Canada, or his thriving California-based Knights Grapevine Nursery, Eckhard understands that protecting vines against viruses means nothing less than protecting a vineyard owner's future.
