

Lincoln Lakeshore

The Lincoln Lakeshore follows the Lake Ontario shore from Winona Road to Jordan Harbour and Twenty Mile Creek, pushing inland to Regional Road 81. This land mass is characterized by long gentle slopes that grade from the Lake Iroquois Bluff and numerous seasonal streams. Glacial, fluvial and lacustrine sedimentary deposits have resulted in a variety of soil types and depths, but soils are primarily light-texture and well to moderately-drained. Again, Lake Ontario has a major impact and provides longer, tempered growing conditions and even ripening.
